UltraTape Announces High Temp Tapes and Labels

Wilsonville, OR MARCH 15, 2015 UltraTape Industries a leading manufacturer of cleanroomtape and label products announces its high temperature tape and label products.

This line of high performance tape and label materials are engineered to survive in the harshest industrial environments such as those associated with electronics manufacturing.

UltraTape's high temperature materials can withstand temperatures up to 260°C and are ideal for masking during printed circuit board assembly, reflow solder, wave solder and other extreme environments.

UltraTape's wide variety of thermal transfer printable tape and label materials are lead-free, residue-free and are REACH & RoHS compliant. Our high temperature tape and label products can be
